Coordinated Access System (CAS)

The Sacramento City and County Continuum of Care, City of Sacramento, and County of Sacramento recently pooled resources to invest \$16 million to create a Coordinated Access System aimed at ensuring people needing services have streamlined and clear paths to go through to access the right help. This investment will ensure that help is more equitable, expedient, and easier to find by our unhoused neighbors.

What is the Coordinated Access System?

A streamlined system designed to match people experiencing homelessness with housing and service options. This process also prioritizes limited local supportive housing resources, so people with the highest vulnerability can be connected to supports as quickly as possible.

DATABASE:

(HMIS)

Information System

KEY PLAYERS: Homeless Management Access points, outreach/ advocates, shelters, service providers, and

housing programs

REFERRAL ENTITY: 2-1-1 operated by Community Link and supported by Sacramento **Steps Forward**

What Can We Accomplish Together Through the Coordinated **Access System?**

STOP homelessness before it begins

CORE ELEMENTS:

prioritization, and referral

Access. assessment.

problem-solving,

SHORTEN the time people must wait to be assessed

STREAMLINE access for people experiencing homelessness

OPTIMIZE existing shelter and housing programs

FORGE a cohesive and coordinated homeless system of care

Why Do We Need a Coordinated Access System?

Navigating the current system is confusing and difficult to access for people seeking resources:

- 60+ access points each with unique services and eligibility criteria
- One third of shelters require a referral

Sacramento's continued rise in homeless is evidence that our current model is not working:

- Local gaps analysis suggests an estimated 16,500 to 20,000 people will experience homelessness annually in Sacramento
- More than half who enter the system are likely to experience homelessness for the first time

1,721

HOUSEHOLDS CURRENTLY OR AT-RISK OF HOMELESSNESS

DATA IS CAPTURED ON A ROLLING BASIS, AND MONTHLY REPORTING MAY OVERLAP.

How is this data collected? The homeless management information system (HMIS) is a locally administered database that captures client-level data and data on the provision of housing and services to homeless individuals, families, and persons at risk of homelessness. HMIS improves service access and delivery and strengthens community planning and resource allocation.

HOUSING CRISIS LINE

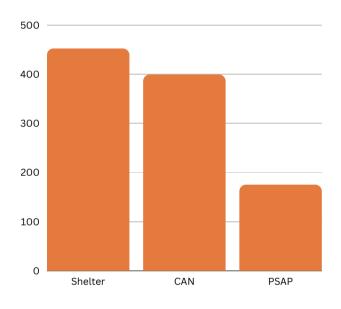

The Housing Crisis Line (2-1-1) connects households seeking housing and homeless resources to appropriate resources.

CALLS HANDLED: 5,711

HIGHEST REQUESTS BY ZIP CODE: 95811, 95823, 95815

AVERAGE CALL WAIT TIME: 7:54
